## CAREER OBJECTIVE

An aspiring web developer with passion for crafting responsive and user-friendly websites. With expertise in front-end technologies like React.js, coupled with backend proficiency in Node.js, Python and database management (MongoDB, SQLite).

## SKILLS

Languages : Python, Javascript, HTML, CSS

Libraries/Frameworks : React.js, Express.js, Flask

Database: MongoDB, SQLite

## PROJECTS

### 1. HOTSTAR CLONE | Python, Javascript, Flask, MongoDB, TMDB API, HTML, CSS

- An OTT platform with watchlist, search, and authenticated user login and logout features integrated in
- Used the YouTube embedding link to play videos and the TMDB API to retrieve movie data

### 2. FLIPKART CLONE | Python, Javascript, Flask, Microservices, MongoDB, HTML, CSS

- A microservices-architected e-commerce platform with authorized user login and logout
- Used MongoDB to store product information and users details

### 3. FINANCE MANAGEMENT | Python, Javascript, Flask, SQLite3, HTML, CSS, Mutual Funds API

- A simple finance management application using the Mutual funds API and CRUD operations
- Used SQLite3 to store fund details and users information

### 4. MARK MY PLACE | Python, Javascript, Flask, MongoDB, Leaflet Library, HTML, CSS

- An app that lets you annotate and mark your favourite locations on a map
- CRUD operations and a map were generated using the Leaflet Library

### 5. TO DO LIST | React.js, HTML, CSS

- An application for adding, updating and removing tasks to be completed (CRUD operations)
- Used Fetch API to manipulate data

### 6. BANK WEBSITE | Javascript, HTML, CSS

- A bank website using advanced DOM manipulation like intersection observer
- Contains a Carousel component and lazy loading images

### 7. BANK APPLICATION | Javascript, HTML, CSS

- A simple bank application created primarily with array methods in Javascript
- Having the ability to transmit, withdraw, and deposit money
